

You decide what to put in

Publications included have been selected by individual faculty members like you. You also decide how to organize and describe your work.

TSpace accommodates materials such as books, articles, working papers, technical reports, pre-prints, conference proceedings, research data, websites, multimedia files, and electronic presentations. There are a few general guidelines:

1. The work must be authored, produced, or sponsored by U of T faculty, e.g., papers from a conference held at the U of T or selected student work may be included.
2. The work must be scholarly, research, or pedagogically oriented. It cannot be ephemeral.
3. The work should be complete and already published or ready for publication.
4. If the work is part of a series, other works in that series should also be contributed.

“faculty work can be safely stored, properly maintained and is permanently accessible”

Leslie Chan
Program Supervisor New Media & International Studies

Removing or updating a publication

Although the Repository is meant to be a permanent scholarly record, authors may request that updated documents be posted. Posting updated versions along with the original material is preferred to show research progression. For times when it will be necessary to remove items, you may request removal from the repository by contacting the administrator

“T Space increases accessibility and that means research impact”

Linda Hutcheon
University Professor, English and Comparative Literature

*Increase the impact
of your research*

T-Space is faculty space established by the Library to support the dissemination of knowledge by the U of T community

tspace.library.utoronto.ca

Research: Visibility, Readership and Longevity

Do you want to improve the findability of your work on the Internet? Then consider T-Space, a free, secure and permanent repository offering worldwide access to U of T's scholarship.

Studies show that readership and citation rates increase 40% to 300% for works openly posted on the Internet. T-Space maximizes your research impact by offering a number of advantages over personal or departmental pages.

T-Space receives priority indexing and ranking by search services such as Google, and Scirus. And we provide usage statistics.

No more broken links

T-Space uses permanent identifiers - URLs that do not change, ensuring no broken links to your work.

Strengthen your Copyright

Most journals now allow authors to openly post a copy of their articles. Ask T-Space staff for assistance or check www.sherpa.ac.uk/romeo.php

We have also negotiated copyright clearance for books, articles, etc. We encourage authors to retain copyright or self archiving privileges.

Copyright is not transferred to T-Space; instead the faculty member grants the library a non exclusive distribution and preservation license.

T-Space also offers an optional legally binding Canadian Creative Commons license to further define appropriate use such as educational use only, share and share alike, etc.

Easy to Use

Just fill in a simple web form. In most cases student or administrative assistants complete this step. Need more customization? T-Space can deliver that too, with a full suite of customizable tools, including batch loading, online peer review, and ways to minimize data entry.

*“extends the life and impact of
research enormously”*

*Rudy Boonstra
Professor of Physiology and Zoology*

Preservation is the top priority

We are at risk of losing much of today's scholarship through simple oversight. Think of how difficult it is to keep your own computer virus free. Electronic media such as 5 ¼" floppies change quickly and information can be easily lost or destroyed. While we can not guarantee that every file type will be usable permanently, at the very minimum we will keep your work safe and authenticated regularly.
